DISTRICT-WIDE SERVICE REIMBURSEMENT	Resolution 2024-42	January 1, 2025

## A. COST RECOVERY FEES

Cosumnes Community Services District provides a combination of public service and specific services. As defined in the Government Finance Officers Associations publication, Financial Policies Design and Implementation, a “public” service is one in which a citizen cannot choose to be excluded or one which delivers a benefit to general public. For example, emergency responses are public services (one which provides a public good and which an individual citizen cannot opt out) whereas field inspections, plan checks, and weed abatement would be a specific service.

The purpose of this fee is to recover costs pertaining to the services that are of a special benefit to easily identified individuals or groups. These fees will not apply to public services. The following reimbursement rates are based on the total cost of delivering the services, including direct costs such as salaries and benefits, indirect costs such as departmental administration costs, and district-wide support costs such as accounting, personnel, data processing, vehicle maintenance, and insurance, etc.

## B. WORK ORDER BILLING

The purpose of this fee is to recover costs related to, but not limited to, services such as, management of park and facility design and construction, maintenance of District facilities, marketing and communication services, fire prevention and planning services, parks and community development related to consultation, studies, designs, investigations, planning, recreational activities, and capital improvement projects.

**Example:** Hourly salary and benefit rate, plus indirect overhead rate costs calculated at 30% of the hourly salary rate. Overtime rate shall be based on the service fee rate x 1.15.
